

Machinery Rescue Awareness (3 hours)

Pre-Requisites: Age 18 and up

PA DOH EMS Con-Ed: 2.5 hrs (1.0 clinical)

Maximum Students: 30

This class teaches emergency responders how to perform a size-up of machinery rescue incidents, so a safe and effective initial response can be implemented. Students will implement scene management strategies and learn how to recognize and mitigate hazards associated with various types of machinery. Students will discuss machinery components, terminology, lockout/tagout, and medical considerations. This class also includes discussion of elevators and response procedures for the most common machinery rescue call – the stalled elevator.
